Your inquiry about "REACH" for Thorsis Technologies products

Dear valued customer

European regulation No 1907/2006 „REACH“ (Registration, Evaluation and Authorization of Chemicals) came into force on June 1, 2007. REACH regulates the use of chemical substances within the European Union, particularly those identified as “Substances of Very High Concern (SVHC)“. A recapitulation of the regulations of REACH is attached hereto.

For purposes of the REACH legislation, Thorsis Technologies is neither a manufacturer nor an importer of chemical products. The products manufactured by Thorsis Technologies are considered as “Articles” under the REACH regulation, and such products do not release any chemical substances under normal and reasonably foreseeable application conditions; i.e. there is no obligation of registration.

In accordance with Art. 33 of REACH we provide information for all downstream users - attached hereto - as soon as our products consist of more than 0.1 % w/w of substances of the SVHC candidate list (see the table for the respective valid list <http://echa.europa.eu/web/guest/candidate-list-table>).

Furthermore our standard products intentionally do not contain any substances according to Annex XVII (see: <https://echa.europa.eu/substances-restricted-under-reach>) in the application and over the concentrations defined therein.

Thorsis Technologies is committed to meeting its legal obligations under REACH. Thorsis Technologies will continue to work with its suppliers and customers as we implement the regulations.

Thorsis Technologies GmbH
Oststraße 18
39114 Magdeburg
Germany
