

Thorsis Technologies statement on RoHS Directive 1 January 2019

Your inquiry concerning "RoHS Directive" for Thorsis Technologies

Dear valued customer,

Thank you for your inquiry regarding Thorsis Technologies compliance with the European Union Restriction of Hazardous Substances (RoHS) Directive 2011/65/EU, which restricts the use of lead (Pb), mercury, cadmium, hexavalent chromium and two bromine-containing flame retardants: PBB (polybrominated biphenyls) and PBDE (polybrominated diphenyl ethers) in electrical and electronic products. From 22 July 2019, an amendment to the Directive (so-called RoHS3) will enter into force, which will also include the following additional substance bans: Bis(2-ethylhexyl) phthalate (DEHP), Butyl benzyl phthalate (BBP), Dibutyl phthalate (DBP), Diisobutyl phthalate (DIBP).

Thorsis Technologies is committed to compliance with all relevant laws and regulations, including the RoHS Directive.

In reply to your inquiry, pursuant to Article 4, section 3 of the RoHS Directive, all Thorsis Technologies's products are today subject to the RoHS Directive from July 2017 on. The restrictions for the additional substances by RoHS3 will apply for our category from July 2021 on.

For Thorsis Technologies's standard products the implementation of actually valid RoHS requirements in the design, production and supply chain is accomplished.

We trust that this letter will answer your questions. Should you require any further information, please contact your local Thorsis Technologies Sales Office (see www.thorsis.com for contact information).

With kind regards,

Dipl.-Ing Thorsten Szczepanski
Managing director
